comments: **BASHIBA CROSSPLAY - BASHIBA CROSSPLAY SYSTEM - The evolution of network gaming**

Crossplay is a novel machine-like software system that allows players to compete across different games. Each player in a session chooses a game and couples with an opponent(s). Once the game begins the system analyses the degree of success in each players moves and influences the difficulty of the opponents game in response. Roberto Vitalini.

host/partner: **the idea care company GmbH**
